

INFECTION CONTROL RISK ASSESSMENT (ICRA)

ICRAs are essential for healthcare construction projects. Our IPAC consultants simplify infection control, saving time and money by addressing risks early and ensuring your project stays safe, efficient, and on track.

We specialize in applying the following infection control standards:

- CSA Standard Z317.2-19 Special Requirements for Heating, Ventilation, and Air-Conditioning (HVAC) Systems in Health Care Facilities
- CSA Standard Z317.13-22 Infection Control during Construction, Renovation, and Maintenance of Healthcare Facilities
- CSA Standard Z8000 Canadian Health Care Facilities
- Canadian Construction Association 82-2018 Mould Guidelines for the Canadian Construction Industry
- Centres for Disease Control and Prevention. MMWR Recommendations and Reports, "Guidelines for Environmental Infection Control in Health-Care Facilities: Recommendations of CDC and the Healthcare Infection Control Practices Advisory Committee (HICPAC)
- IICRC ANSI/IICRC S520 (2015) Standard for Professional Mold Remediation, 3Rd Edition
- New York City Department of Health and Mental Hygiene, Bureau of Environmental and Occupational Disease Epidemiology, Guidelines on Assessment and Remediation of Fungi in Indoor Environments, 2008
- Ontario Ministry of Health and Long-Term Care, Capital Planning Manual
- Ontario Ministry of Health and Long-Term Care, Generic Output Specification
- Provincial Infectious Diseases Advisory Committee (PIDAC). Best Practices for Routine Practice and Additional Precautions in All Health Care Settings
- Provincial Infectious Diseases Advisory Committee (PIDAC). Best Practices for Environmental Cleaning for Prevention and Control of Infections in All Health Care Settings
