

# Is your Dental Practice Audit Ready?

If you answer ✗ to even ONE question, your practice may be at risk of non-compliance. Put ✓ for YES or ✗ for NO to the following questions:

Do you have a dedicated hand hygiene sink in each clinical area, separate from the reprocessing area?

Are alcohol-based hand rub (ABHR) dispensers (70-90%) available at all patient care areas?

Are your sterilization areas properly separated into “dirty” and “clean” zones with one-way workflow?

Are your ultrasonic cleaners and sterilizers tested at the required intervals (weekly ultrasonic efficacy test & daily sterilizer cycle monitoring)?

Are staff wearing the appropriate personal protective equipment (PPE) for every procedure, including masks, eyewear, and gloves?

Are all patient care areas, including dental chairs, cleaned and disinfected between every patient visit?

Are dental unit waterlines being purged for at least 2 minutes at the start of the day and between patients?

Are your dental handpieces sterilized after every patient use?

Do you have a written IPAC policy manual, including staff training records, safety data sheets, and equipment maintenance logs?

Have all staff received IPAC and reprocessing training within the last year, with attendance documented?
